

RADIOLOGY

Effective April 1, 2015 the health service codes & MSU values used to bulk bill Radiology services will remain the same for the switch to electronic billing. Although a change was previously communicated for the cardiac doppler health service codes, this has been revised and they shall continue to begin with "R" for radiologist billings.

CATEGORY	HEALTH SERVICE CODE	GROUP	DESCRIPTION	BASE UNITS	US=PREM	US=PR50	MAX MULTIPLES ON ENCOUNTER (EACH PAYS @ 100%)	BILATERAL MODIFIER
BULK	R1	Other	Interpretation of submitted films	6.25	15.25	15.25	1	N/A

Billing Rules:

- The majority of Radiology health service codes are not changing. Note however that the old codes used to specify premium fees no longer exist. To claim for premium fees please use the modifiers US=PREM or US=PR50 while submitting the base fee code. For more information on premium fees refer to the Physician's Manual preamble section 5.1.81. The unit value for premium fees has not changed. Please note that no premium fees were added to services that did not have premiums under the previous bulk billing method.
- The service date for electronic claims should be the date the patient had the procedure conducted or samples removed, and not the date the interpretation was completed (if they differ). The fee is for the interpretation.
- All of the above radiology codes must be billed from a hospital location. The only exceptions are the following Mammography interpretations which can be billed by the mobile breast screening clinic: Mammography screening bilateral (R484), Mammography unilateral (R485), and Breast cystography (R486).
- Normally the payment responsibility for most services is entered as MSI. However, there are instances where the payment responsibility will change, for example; service encounters under Workers' Compensation Board (WCB) and Out of Province (OOP). If the service encounter is for a service provided to a non-resident registered with another provincial health plan except Quebec the home province code is entered in this field, e.g. NB, ON, PE. The service also requires a person data record for the non-resident. More information can be found in the Physician's Manual under section 3.2.115.

- Workers' Compensation Board service encounter for a non-resident cannot be submitted electronically to MSI for payment. Service encounters for services provided, as a result of an on the job injury, to a non-resident temporarily working for a Nova Scotia company, should be submitted directly to the Nova Scotia Workers' Compensation Board. More information can be found in the Physician's Manual under section 2.5.6
- Radiology interpretation services may use the following new diagnostic code for all of the fees listed above:
 - R999 – Radiology Interpretation - This is an interim measure until a solution is available to allow more accurate reporting of diagnoses for the services provided.
- Select radiology codes have been modified with the ability to bill for bilateral interpretations using the RG=BOTH modifier. These codes are indicated in the list above. Please use the bilateral modifier where applicable for proper payment.

Billing rules as outlined in preamble:

- An intravenous urogram includes an abdominal survey, thus a separate claim cannot be made for the film. If you are billing a tomography along with the intravenous urogram please include text on the tomography claim referring to the necessity. Routine tomography may not be claimed with an IVP. (Preamble section 5.3.147)
- A fluoroscopy cannot be claimed with services where it is an integral part of examination. Services that include the fluoroscopy include R620, R625, R630, R635, R640, R650, R655, R660, R666, R670, R690, R710, R745, R830, R835, R840, R845, R850, R865, R50, R70, R150, R151, R152, R230, R350, R351, and all vascular (R1001-R1071). (Preamble section 5.3.148)
- The fluoroscopy code R403 cannot be claimed with any other services at the same encounter. (Preamble section 5.3.149)
- The Paediatric codes for Upper G.I., Colon, and Cystography cannot be billed for patients over 12 years old (the non-paediatric codes should be used instead). Also a claim cannot be made for the paediatric version of these codes if the non-paediatric fee has already been claimed at that time and vice versa. (Preamble section 5.3.158)
- The separate C.T. interpretation fees for with contrast and without contrast cannot be billed together for the same anatomical area. In this case the combined fee should be claimed. For example, If 'CT head with contrast' (R1111) and 'CT head without contrast' (R1105) are performed, the physician should bill 'CT head without and with contrast' (R1115). (Preamble section 5.3.159)
- An abdominal general ultrasound cannot be billed with an ultrasound of the pylorus, appendix, aorta, kidneys, or bladder. These are considered to be included in the general ultrasound. (Preamble section 5.3.161)

- The separate Pelvic (R1220) and endovaginal (R1225) examination fees should not be billed together. When both are performed the combined endovaginal with pelvic fee (R1226) should be used. (Preamble section 5.3.165)
- The intra operative code R1306 cannot be claimed with any other services at the same encounter. (Preamble section 5.3.166)
- Venogram studies include a central film. No additional claim should be made for the film at the same encounter. (Preamble section 5.3.168)
- A bilateral venogram study cannot be billed with a unilateral venogram study for the same veins. For example, a unilateral pulmonary angiogram cannot be billed with a bilateral pulmonary angiogram.
- Please include text on all claims for A.C.E. inhibitor renogram (R1881) indicating who administered and supervised the A.C.E. inhibitor. Any claims for this fee without electronic text will pay at zero and a request will be made to resubmit with the applicable information. If the physician did not administer and supervise, then a renal scan and renogram (R1880) should be billed instead. (Preamble section 5.3.177)
- An A.C.E. inhibitor renogram or renal static imaging cannot be billed at the same encounter as a renal scan and renogram.
- The following services are considered to be an add-on fees and cannot be billed unless another fee is also claimed prior at the same encounter: Portable examination fee (R1307), Residual urine volume (R1899), Tomography (R1950), Flow Studies (R1790), Diuretic stimulation (R1885), Myocardial rest quantitative (R1906), and Myocardial stress and rest quantitative (R1907). (Preamble sections 5.3.164, 5.3.179, 5.3.180, 5.3.183, 5.3.185)
- Residual urine volume (R1899) may only be billed after a renal static imaging, renal scan and renogram, or A.C.E. renal scan has been claimed at the same encounter. (Preamble section 5.3.179)
- Myocardial rest quantitative (R1906) may only be billed after a myocardial rest (R1904) has been claimed at the same encounter. (Preamble section 5.3.185)
- Myocardial stress and rest quantitative (R1907) may only be billed after a myocardial stress and rest (R1905) has been claimed at the same encounter. (Preamble section 5.3.185)
- The "one area" bone (R1816), bone marrow (R1818), and gallium (R1777) scans cannot be claimed at the same time as their multiple area counterparts (R1817, R1819, and R1778 respectively). (Preamble section 5.3.182)
- As per preamble section 5.2.100, a genetic sonogram (02.89B) includes all necessary imaging. Ultrasound interpretation fees are not payable with a genetic sonogram.
